

DEPARTMENT OF

ECONOMICS

Fogelman College
of Business & Economics

YOUR MAJOR. YOUR CAREER.

MAJOR DECISION

SELECTING ECONOMICS AS YOUR FOCUS

Many assume that the study of economics is only about finance and the stock market, but in truth, the field is much broader. By majoring in economics, you will learn fundamental principles that guide decision-making in almost all aspects of business. Economics delves into the science of human behavior, intersecting such diverse disciplines as law, anthropology, physics, sociology, engineering, history, math, education, medicine, environment and agriculture. As a student of economics, you will tap into all these fields to gain an understanding of how markets function.

Economists work in a variety of industries, analyzing market trends to improve an organization's operations & forecast sales or studying sociological problems to shape policy. If applying critical thinking skills and logical reasoning to solve problems in business or society appeals to you, then consider choosing economics as your major.

A CAREER IN DEMAND

As the global economy grows more complex and competitive, the demand for economists with strong analytical skills increases. A degree in economics means that you will have a versatile skill set that relies on human elements, thereby safeguarding you against the rise of artificial intelligence (AI). Multinational companies, such as Amazon and Google, continue to seek economic scholars who are prepared to meet the challenges of an ever-evolving marketplace.

If your sights are set on attending law school, a focus in economics is solid preparation. Studies have also found that students majoring in economics generally score higher on the LSAT exam than do those of other majors.

OUR PROGRAM

Fogelman College of Business & Economics (FCBE) offers several paths to a degree with a concentration in economics. Both international and domestic corporations recognize the prestige of our economics program and regularly recruit our graduates for hire. Our graduates have matriculated to and completed some of the best graduate programs in the world, including Cornell University, Harvard Law School, Columbia University, Washington University, London School of Economics, University of Houston, Georgetown University and Johns Hopkins University. We offer a variety of degree paths, such as:

Bachelor of Arts in Economics (BA)

Bachelor of Business Administration in Business Economics (BBA)

Bachelor of Business Administration in Business Economics with a Concentration in Financial Economics (BBA)

Honors Degree in Economics

A student may obtain a departmental honors degree in economics through FCBE or through the Helen Hardin Honors College..

Accelerated BA/MA Program

Outstanding undergraduate economics majors at UofM may begin coursework for the MA in economics during their senior year. These select students may complete the MA degree in one additional year (after completion of the BA degree).

Master of Arts in Economics (MA)

A STEM designated degree that has two tracks, an applied track or an academic track.

Doctor of Philosophy in Business Administration with Concentration in Economics (PhD)

Recent graduates have found employment opportunities at Fortune 500 firms, government agencies and major universities.

- STS Elite
- Black Scholars Unlimited
- American Economic Association Summer and Scholarship Programs (AEASP)

"I chose to study economics because of the numerous opportunities this field presents. Whether you have aspirations in law, finance, government, healthcare or policy, economics offers many career options upon graduation. The economics professors at the Fogelman College of Business & Economics genuinely care about developing their students' interests, which makes every class challenging and engaging."

FROM CLASSROOM TO CAREER

Economics majors at FCBE have unique access to professional and community opportunities to gain real-world experience and enhance job prospects.

Memphis Institute for Leadership Education (MILE)

Available to all FCBE majors, this program pairs select, top students with local business and organizational leaders who serve as mentors.

Consumer Neuro-Insights Research Lab (C-NRL)

FCBE students may conduct research studies using such technologies as eye-tracking, automated facial expression recognition, galvanic skin response, pupillometry, heart rate, EEG and implicit association testing.

Internships

Secure internships with major companies through the **Fogelman Internship Network (FIN)** and the **Center for Professional Career Development (CPCD)**. The CPCD also offers business etiquette, ethics, resume building, mock interviewing, career counseling, as well as internship and career fairs held in spring and fall.

Study Abroad

For immersive cultural experiences, FCBE students may apply for international study abroad opportunities
