

CAREER OPPORTUNITIES

Graduates with advanced knowledge of information systems achieve salaries which are typically higher than other business majors. Nationally, a bachelor's MIS placement rate is very high with most graduates finding work in their field of study very soon after graduation.

Positions Accepted by our MIS Graduates

- Business Systems Analyst
- Chief Data Officer
- Chief Information Officer
- Chief Information Security Officer
- Chief Technology Officer
- Information Assurance Analyst
- Process Analyst
- Programmer Analyst

Employers Hiring our MIS Graduates

MIS majors at FCBE have unique access to networking opportunities and internships. Sixty-seven percent of our graduates have one or more internships and are twice as likely to get a job offer. Local and international firms and corporations heavily recruit our students, putting our graduates in high demand. Our graduates have found employment at organizations such as:

YOUR MAJOR. YOUR CAREER. MAJOR DECISION

SELECTING YOUR AREA OF CONCENTRATION

If a career in one of the most sought-after, rapidly growing fields with multiple job opportunities and high earning potential sounds intriguing, then majoring in Management Information Systems (MIS) is for you.

MIS is the study of how to improve business processes using information/computer systems. With this degree, you will develop strong communication, problem solving, analytical and critical thinking skills.

Whether you're an introvert or extrovert, a collaborator, organizer or leader, a MIS degree may suit you well.

MSIS, '24

Member | AMIS

"My decision to pursue MSIS stemmed from a deep-seated fascination with how technology revolutionized the business landscape. My time at FCBE equipped me with the tools to navigate complex data analytics, artificial intelligence, project management and digital innovation, thus empowering me to tackle real-world challenges head-on. Beyond just acquiring technical prowess, I view MIS as a conduit to leadership and organizational transformation. I envision myself as a catalyst for change, steering companies towards success through technology-driven solutions. This field perfectly aligned with my innate passions and career aspirations."
