

POWER UP YOUR CAREER

EARN A GRADUATE CERTIFICATE IN BUSINESS INFORMATION ASSURANCE

Looking for a quick way to enhance your leadership skills to help organizations make better decisions in a technologically-driven world?

The **Graduate Certificate in Business Information Assurance** offered through the MIS Department at the Fogelman College of Business & Economics is a four-course program that can be taken post-bachelor's degree, post-master's degree or as part of a master's degree program.

This program is composed of many managerial methodologies in high demand such as how to properly manage an organization's assets related to a wide range of information security and privacy threats, how to plan for possible breaches of security and handling resulting problems.

Benefits

- **Certified** – Offered through the University of Memphis Fogelman College of Business & Economics, which is 100% AACSB accredited.
- **Flexible** – Classes are available in both traditional classroom and fully online formats. The certificate can be completed quickly with available sections in summer, fall and spring semesters.
- **Expandable** – Classes taken to earn the Certificate can count toward a master's degree in Information Services for degree-seeking students.
- **Connected** – Take advantage of the tremendous networking opportunities with other professionals in your career.
- **Extended-Residency** – Graduates of the MSIS degree program and the Project Management Certificate program may apply for extended months of OPT after completion of both programs during the same semester.
- **High-Demand** – There is a continuously increasing level of demand from the business community and advisory boards for individuals with specialized project management training.
- **Continued-Learning** – By enrolling in this Project Management Certificate program you can earn PDUs to maintain a PMP Certification.

Curriculum

The Business Information Assurance Certificate is a 12-credit hour/four course program. Design your schedule to meet your needs and interests based on the following options:

Required:

- MIS 7455 – Cyber Ethics in IT
- MIS 7670 – Information Security Management
- MIS 7650 – Information Systems for the Global Enterprise
- MIS 7610 – Systems Analysis & Design

Admission Requirements

- Undergraduate bachelor's degree & official transcript
- Completed application (see contact information below for a copy of the application)
- You do not need a GRE or GMAT score unless applying for degree-seeking status to earn a master's degree
