

Fogelman College of Business
BIT Major
Spring 2018 Analysis (SACS)

Faculty Contributors: Ted Lee, Judy Simon, Sandra Richardson
Analysis: Sandy Schaeffer

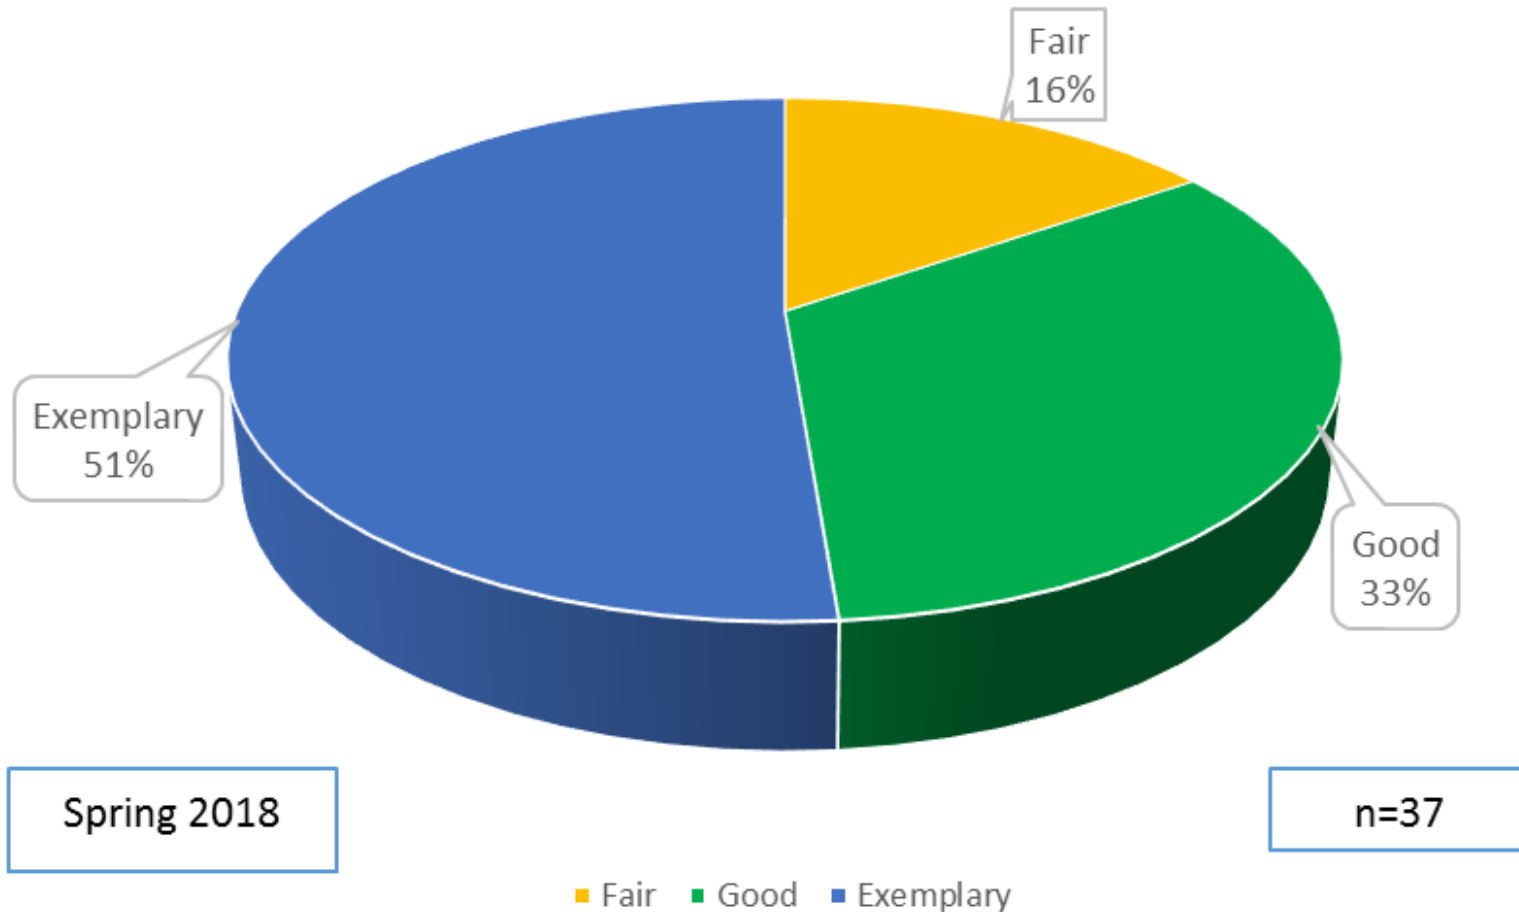

Assessment Summary

- Benchmark: A least 80% of all assessed students score at either the good (2) or exemplary (3) levels. For any learning outcome where 20% or more assessed at the fair (1) level, the benchmark would not be met requiring interventions to address.
- Assessment results for all three learning outcomes showed a sufficient level of mastery to meet this benchmark:
 - Learning Outcome #1 (82% good/exemplary)
 - Learning Outcome #2 (84% good/exemplary)
 - Learning Outcome #3 (83% good/exemplary)

BIT Major - Learning Outcome #1: Graduates can describe the elements of an effective information systems analysis process.

BIT Major - Learning Outcome #2: Graduates can demonstrate a knowledge of the critical elements of information systems design, implementation and maintenance.

BIT Major - Learning Outcome #3: Graduates can explain and support the role of a successful information systems manager in an organization
