COMPETITION IN THE 21ST CENTURY:

CAN EXISTING ANTITRUST LAWS GOVERN A 21ST CENTURY DIGITAL ECONOMY?

Volume 52 of *The University of Memphis Law Review* is pleased to welcome you to an important discussion where we will explore whether existing antitrust law is sufficient to govern a 21st-century digital economy. Modern antitrust law in the United States has developed from the original passage of the Sherman Act of 1890 to a system largely focused on protecting the competitive process and increasing consumer welfare. We are honored to present a distinguished group of scholars and legal practitioners who will critically examine whether this approach is adequate for the rapidly changing digital economy of the 21st-century, where some claim that companies like Amazon, Apple, Facebook and Google are reminiscent of the oil and steel trusts which motivated the original passage of the Sherman Act.

SYMPOSIUM SCHEDULE

*All times in Central Time

- 8:30–9:00 AM** **Registration**
